

Lentil Spinach Soup

Serves: 6-8 (make 2 pots)

Ingredients

1 medium onion, diced
3 carrots, diced
4-5 cloves garlic, minced
2 cups dry green lentils, rinsed
15 oz can diced tomatoes
4 cups vegetable broth
3 cups water
4-5 oz spinach, roughly chopped
1 ½ tsp cumin
1 tsp smoked paprika
¼ tsp salt, more to taste

Instructions

1. In a large stockpot over medium heat, sauté onion and carrot for about 7 minutes.
2. Add garlic, cumin, paprika, and salt to stockpot. Sauté 1 minute.
3. Add broth, water, tomatoes, and lentils.
4. Increase heat and bring to a boil. When at a boil, reduce heat, cover, and simmer for about 30 minutes or until lentils are tender.
5. Add spinach during last couple minutes of cooking, and salt and pepper to taste.

Citrus Vinaigrette Salad

Serves: 12 side salads

Ingredients

Salad

20 oz of baby spinach
2 pints of halved cherry tomatoes
1 cup red onion
4 medium oranges segmented
1 cup pecans

Dressing (may serve more than 12)

6 Tbsp olive oil
1/2 cup water
1/4 cup white wine vinegar
8 tsp minced garlic
2 Tbsp dijon mustard
4 tsp lime juice
4 tsp lemon juice
2 Tbsp honey
1.5 tsp dried parsley
1 tsp dried basil
1/2 tsp dried oregano
1/2 tsp salt
Dash of fresh ground black pepper

Instructions

1. Top spinach with cherry tomatoes, red onion, and segmented oranges. Saving pecans until just before serving. When ready sprinkle on top.
2. Combine and whisk the dressing ingredients together in a separate bowl and serve over or alongside the salad.

Warm Up & Cool Down Routines

WARM UP & COOL DOWN ROUTINES

It's super important to make sure you warm up before you dive into your workout, and also just as important that you cool down after your workout. Warming up and cooling down can help reduce your risk of injury and improve your athletic performance.

Starting your physical activity slowly at a reduced pace, allows for your body temperature and blood flow to slowly increase allowing your cardiovascular system to kick in preparing your body for more physical activity.

Cooling down allows for a gradual recovery of pre-exercise heart rate and blood pressure and regulates blood flow.

HOW TO WARM UP

Start warming up right before you work out. Focus on your large muscle groups and add exercises specific to the activity you will focus on in your workout. Make sure you start at a slow pace and gradually increase the speed and intensity.

HOW TO COOL DOWN

Cooling down is basically just continuing to do your workout routine but at a slower pace and reduced intensity. Continue your cool down until your heart rate is lower.
